

Heating of tower Jindrisska Vez in Prague

In year 2002 Fenix heating systems were installed in interior of historical tower Jindrisska Tower in Prague. Floor heating ECOFLOOR was installed on each stage of this building, where coffee, sweetshop and several galleries are situated. Radiant heating panels ECOSUN and el.convectors ECOFLEX were installed in attic. This area is used as a drawing room. Function of Fenix heating systems is ideal and efficient, whereas do not affect the historical design of interior.
